Description of the Central Supply Depot of the HVA is located in Berlin-Kentralviehhof, from where incoming and outgoing shipments of furniture, sections of prefabricated houses, machinery; etc. were frequently reported recently. The incoming shipments of new equipment from Thuringia and Saxony in December 1950 and January 1951 seem to have been very extensive. However, there is no exact basis for comparison since shipments of this kind were not reported previously, and since outgoing shipments are probably also made by truck. It therefore cannot be determined whether those shipments are linked with the evacuation of WP quarters in Thuringia and Saxony.
